A Clinician’s Perspective 1252

Tardive expansion congenital hemangioma: A niche within NICH?
Warren R. Heymann, MD

Original Articles 1254

Bottom line: Shared decision making, adherence to evidence-based treatment, and the urgent use of novel COVID-19 vaccination are recommended. The guidance statements will be updated in accordance with the rapidly evolving science of COVID-19.

Joel M. Gelfand, MD, MSCE, April W. Armstrong, MD, MPH, Stacie Bell, PhD, George L. Anesi, MD, MSCE, MBE, Andrew Blauvelt, MD, MBA, Cassandra Calabrese, DO, Erica D. Dommasch, MD, MPH, Steven R. Feldman, MD, PhD, Dafna Gladman, MD, FRCP, Leon Kirkcik, MD, Mark Lebwohl, MD, Vincent Lo Re III, MD, MSCE, George Martin, MD, Joseph F. Merola, MD, MMSc, Jose U. Scher, MD, Sergio Schwartzman, MD, James R. Treat, MD, Abby S. Van Voorhees, MD, Christoph T. Ellebrecht, MD, Justine Fenner, MD, Anthony Ocon, MD, PhD, Maha N. Syed, MBBS, Erica J. Weinstein, MD, George Gondo, MA, Sue Heydon, MA, Samantha Koons, BS, and Christopher T. Ritchlin, MD, MPH

Twice-weekly topical calcipotriene/betamethasone dipropionate foam as proactive management of plaque psoriasis increases time in remission and is well tolerated over 52 weeks (PSO-LONG trial)

Bottom line: Long-term proactive management with calcipotriene/betamethasone dipropionate foam twice-weekly was more efficacious vs vehicle foam for prolonging time to first relapse, increasing time in remission, and reducing number of relapses.

Mark Lebwohl, MD, Leon Kirkcik, MD, Jean-Philippe Lacour, MD, PhD, Monika Liljedahl, MD, PhD, Charles Lynde, MD, FRCP, Marie Holst Mørch, MS, Kim A. Papp, MD, FRCP, PhD, Jean-Luc Perrot, MD, PhD, Linda Stein Gold, MD, Amrit Takhar, MBChB, MRCGP, Diamant Thaçi, MD, PhD, Richard B. Warren, MBChB, FRCP, PhD, and Andreas Wollenberg, MD

Tacrolimus 0.1% versus ciclopiroxolamine 1% for maintenance therapy in patients with severe facial seborrheic dermatitis: A multicenter, double-blind, randomized controlled study

Pascal Joly, MD, PhD, Inès Tejedor, MD, Florence Teiari, MD, Hélène Collas Cailleux, MD, Alice Barrel, MD, Paul Arnaud De Previle, PhD, Nathalie Mion-Mouton, MD, Germaine Gabison, MD, Sophie Baricault, MD, Catherine Girardin Tordeur, MD, Martin Xavier Dore, MD, Bernard Rossi, MD, Catherine Bourseau-Quetier, MD, Mélanie Chamaillard, MD, Sandra Ly, MD, Olivier Chosidow, MD, PhD, Marie-Aleth Richard-Lallemand, MD, PhD, Jean-Claude Rzeznik, MD, Jean-Michel Amici, MD, Guillaume Lair, MD, Sylvie Bechu, MD, Jacques Benichou, MD, PhD, Caroline Thill, MSc, and Marie Beylot-Barry, MD, PhD
Effectiveness of dutasteride in a large series of patients with frontal fibrosing alopecia in real clinical practice

Bottom line: The response was associated with an increasing dose of dutasteride, with the most effective dose being 5 to 7 capsules of dutasteride 0.5 mg per week.

Cristina Pindado-Ortega, MD, David Saceda-Corralo, MD, PhD, Óscar M. Moreno-Arrones, MD, PhD, Ana R. Rodrigues-Barata, MD, Á. Hermosa-Gelbard, MD, Pedro Jaén-Olasolo, MD, PhD, and Sergio Vanó-Galván, MD, PhD

Clinical size is a poor predictor of invasion in melanoma of the lentigo maligna type

Bottom line: Because LM lesions are unpredictable and clinical assessment is challenging, careful presurgical planning and margin-controlled techniques are necessary.

Cristian Navarrete-Dechent, MD, Saud Aleissa, MD, Karen Connolly, MD, Brian P. Hibler, MD, Stephen W. Dusza, PhD, Anthony M. Rossi, MD, Erica Lee, MD, and Kishwer S. Nehal, MD

Trends in mortality and cause-specific mortality among patients with psoriasis and psoriatic arthritis in Ontario, Canada

Bottom line: Despite advances in therapy, mortality remains elevated, highlighting the population burden of the disease and showing that more efforts are needed to improve survival.

Keith Colaco, MSc, Jessica Widdifield, PhD, Jin Luo, MSc, Cheryl F. Rosen, MD, Raed Alhusayen, MBBS, J. Michael Paterson, MSc, Willemina Campbell, LLB, Karen Tu, MD, MSc, Sasha Bernatsky, MD, PhD, Dafna D. Gladman, MD, and Lihi Eder, MD, PhD

Immune checkpoint-mediated psoriasis: A multicenter European study of 115 patients from the European Network for Cutaneous Adverse Event to Oncologic Drugs (ENCADO) group

Bottom line: Psoriasis affecting more than 10% of the body surface area as well as pustular psoriasis increase the risk of treatment modification/interruption. Guttate psoriasis and grade 2 or 3 disease may be significant positive prognostic indicators for antitumoral effect of immune checkpoint inhibitors.

Vasiliki Nikolaou, MD, Vincent Sibaud, MD, Davide Fattore, MD, Pietro Sollena, MD, Ariadna Ortiz-Brugués, MD, Damien Giaccher, MD, Maria Concetta Romano, MD, Julia Riganti, MD, Konstantinos Lallas, MD, Ketty Peris, MD, Dimitra Voudouri, MD, Aimilios Lallas, MD, Gabriella Fabbrocini, MD, Elisabeth Lazaridou, MD, Cristina Carrera, MD, Maria Carmela Annunziata, MD, Ernesto Rossi, MD, Angela Patri, MD, Dimitrios Rigopoulos, MD, Alexander J. Stratigos, MD, and Zoe Apalla, MD
1321 Evaluation of platelet-rich plasma on hair regrowth and lesional T-cell cytokine expression in alopecia areata: A randomized observer-blinded, placebo-controlled, split-head pilot study

Bottom line: Although better than placebo, platelet-rich plasma did not produce significant hair regrowth. Its effect on restoring local immune balance may warrant evaluation as adjuvant treatment.

Vishal Gupta, MD, Anita Singh Parihar, PhD, Vinod Kumar Sharma, MD, Suman Jain, PhD, Vishwajeet Singh, PhD, and Neena Khanna, MD

1329 Metabolic syndrome and its factors are associated with noncalcified coronary burden in psoriasis: An observational cohort study

Bottom line: Metabolic syndrome and its factors, particularly hypertension and central obesity, are important determinants of noncalcified coronary burden in psoriasis. Increased awareness of metabolic syndrome in psoriasis is important to reduce this heightened cardiovascular disease risk.

Meron Teklu, BA, Wunan Zhou, MD, MPH, Promita Kapoor, CCRP, Nidhi Patel, BS, Anit K. Dey, MD, Alexander V. Sorokin, MD, PhD, Grigory A. Manyak, BA, Heather L. Teague, PhD, Julie A. Erb-Alvarez, MPH, Aparna Sajja, MD, Khaled M. Abdelrahman, BS, Aarthi S. Reddy, BS, Domingo E. Uceda, BS, Sundus S. Lateef, BS, Sujata M. Shanbhag, MD, Colin Scott, BS, Nina Prakash, Maryia Sivrydava, BS, Philip Parel, Justin A. Rodante, PA-C, Andrew Keel, CRNP, Evan L. Siegel, MD, Marcus Y. Chen, MD, David A. Bluemke, MD, PhD, Martin P. Playford, PhD, Joel M. Gelfand, MD, MSCE, and Nehal N. Mehta, MD, MSCE, FAHA

1339 Facial and neck erythema associated with dupilumab treatment: A systematic review

Bottom line: Prompt identification and management of this adverse event is needed to minimize its negative influences and potential discontinuations. Different diagnoses that should be considered include rosacea, allergic contact dermatitis, and head and neck dermatitis.

Christine E. Jo, BSc, Alexandra Finstad, BScH, BAH, Jorge R. Georgakopoulos, MD, Vincent Piguet, MD, PhD, FRCP, Jensen Yeung, MD, FRCPC, and Aaron M. Drucker, MD, ScM, FRCPC

1348 Long-term use of spironolactone for acne in women: A case series of 403 patients

Bottom line: Increasing the use of spironolactone for women with acne may improve outcomes and reduce reliance on oral antibiotics.

Vaibhav Garg, BS, Juliana K. Choi, MD, PhD, William D. James, MD, and John S. Barbieri, MD, MBA

</table>
Impact of second-opinion dermatopathology reviews on surgical management of malignant neoplasms

Bottom line: Through second-opinion review, dermatopathologists identified a significant rate of discordant diagnoses leading to cancelled surgical treatment. Given its effect on patient management, second-opinion dermatopathologic review should be considered for surgical referrals.

Mary E. Lohman, MD, Roy C. Grekin, MD, Jeffrey P. North, MD, and Isaac M. Neuhaus, MD

Photoprotection beyond ultraviolet radiation: A review of tinted sunscreens

Bottom line: Tinted sunscreens can provide photoprotection against visible light. Patients with hyperpigmentation disorders, including melasma, or those with visible light–induced photodermatoses can benefit from the use of tinted sunscreen.

Alexis B. Lyons, MD, Carles Trullas, MSc, Indermeet Kohli, PhD, Iltefat H. Hamzavi, MD, and Henry W. Lim, MD
