Melanoma healthcare and outcome disparities
Warren R. Heymann, MD

Use of teledermatology by dermatology hospitalists is effective in the diagnosis and management of inpatient disease
Bottom line: Teledermatology in the inpatient setting may be a clinically acceptable option for diagnosis, evaluation, and management. This may represent a novel and effective option for hospitals.
Colleen K. Gabel, BS, Emily Nguyen, BS, Ryan Karmouta, MD, MBA, Kristina J. Liu, MD, MHS, Guohai Zhou, PhD, Allireza Alloo, MD, Ryan Arakaki, MD, Yevgeniy Balagula, MD, Alina G. Bridges, DO, Edward W. Cowen, MD, MHSc, Mark Denis P. Davis, MD, Alisa Femia, MD, Joanna Harp, MD, Benjamin Kaffenberger, MD, Jesse J. Keller, MD, Bernice Y. Kwong, MD, Alina Markova, MD, Melissa Mauskar, MD, Robert Micheletti, MD, Arash Mostaghimi, MD, MPH, Joseph Pierson, MD, Misha Rosenbach, MD, Zachary Schwager, MD, Lucia Seminario-Vidal, MD, PhD, Victoria R. Sharon, MD, DTMH, Philip I. Song, MD, Lindsay C. Strowd, MD, Andrew C. Walls, MD, Karolyn A. Wanat, MD, David A. Wetter, MD, Scott Worswick, MD, Carolyn Ziemer, MD, MPH, Joseph Kvedar, MD, Anar Mikailov, MD, and Daniela Kroshinsky, MD, MPH

Cutaneous reactions in children treated with MEK inhibitors, BRAF inhibitors, or combination therapy: A multicenter study
Bottom line: This study shows that cutaneous reactions are common in children on MEKI/BRAFI. One third of children had a treatment alteration/disruption due to a cutaneous reaction. Preventative skin care measures could help prevent many treatment alterations.
Christina L. Boull, MD, Samantha Gardeen, MD, Talal Abdali, MD, Edward Li, PhD, Jolee Potts, BS, Nathan Rubin, MS, Valerie M. Carlberg, MD, Deepsi Gupta, MD, Raegan Hunt, MD, PhD, Minnelly Lau, MD, Sheilagh M. Maguiness, MD, Christopher L. Moertel, MD, Hannah Song, MD, Karina L. Vivar, MD, Carrie Coughlin, MD, Jennifer T. Huang, MD, and Irene Lara-Corrales, MD

Evaluating change in disease activity needed to reflect meaningful improvement in quality of life for clinical trials in cutaneous lupus erythematosus
Bottom line: Analysis of clinical trials can include patients with milder disease and use endpoints that are meaningful to patients to advance new treatments.
Srita Chakka, MD, Rebecca L. Krain, MD, Sarah Ahmed, MD, Josef Symon S. Concha, MD, Rui Feng, PhD, Joan T. Merrill, MD, and Victoria P. Werth, MD
1568 Dark pigmented lesions: Diagnostic accuracy of dermoscopy and reflectance confocal microscopy in a tertiary referral center for skin cancer diagnosis

Bottom line: The integration of reflectance confocal microscopy for 370 dark pigmented lesions with clinical and dermoscopic suspicion for melanoma allowed us to save 60.6% of unnecessary excisions while improving the number needed to excise.

Caterina Longo, MD, PhD, Mauro Mazzeo, MD, Margherita Raucci, RN, Luigi Cornacchia, MD, Michela Lai, MD, Luca Bianchi, MD, Ketty Peris, MD, Riccardo Pampena, MD, and Giovanni Pellacani, MD

1575 In vivo imaging characterization of basal cell carcinoma and cutaneous response to high-dose ionizing radiation therapy: A prospective study of reflectance confocal microscopy, dermoscopy, and ultrasonography

Bottom line: In the future, patients undergoing nonsurgical modalities, such as radiation therapy, may benefit from these emerging noninvasive diagnostic modalities to guide and monitor treatment.

Cristian Navarrete-Dechent, MD, Miguel Cordova, MD, Konstantinos Liopyris, MD, Saud Aleissa, MD, Milind Rajadhyaksha, PhD, Gil’ad Cohen, MS, Ashfaq A. Marghoob, MD, Anthony M. Rossi, MD, and Christopher A. Barker, MD

1585 The ongoing racial disparities in melanoma: An analysis of the Surveillance, Epidemiology, and End Results database (1975-2016)

Bottom line: Improving postdiagnosis management for minorities with localized disease is imperative to improve survival outcomes.

Yingzhi Qian, MA, Paul Johannet, MD, Amelia Sawyers, BA, Jaehong Yu, PhD, Iman Osman, MD, and Judy Zhong, PhD
The Alopecia Areata Consensus of Experts (ACE) study part II: Results of an international expert opinion on diagnosis and laboratory evaluation for alopecia areata

Bottom line: The consensus document identifies potential areas where research may be directed.

Nekma Meah, MBChB, MRCP (UK), FACD, Dmitri Wall, MBChB, BAO, MRCP, Katherine York, MBChB, FCDerm (SA), Bevin Bhoyrul, MBBS, MRCP (UK), Laita Bokhari, MPhil Med, Daniel Az-Sigall, MD, Wilma F. Sinclair, MBBS, MD, FACD

Age-appropriate cancer screening: A cohort study of adults with psoriasis prescribed biologics, adults in the general population, and adults with hypertension

Bottom line: Patients with psoriasis who are prescribed biologic therapies may not be receiving adequate age-appropriate cancer screening, especially for breast and colon cancer.

John S. Barbieri, MD, MBA, Shiyu Wang, MS, Alexis R. Ogdie, MD, MSCE, Daniel B. Shin, PhD, and Junko Takeshita, MD, PhD, MSCE

Skin disease is more recalcitrant than muscle disease: A long-term prospective study of 184 children with juvenile dermatomyositis

Bottom line: Clinicians should consider both the activity of skin manifestations and muscle dysfunction in therapeutic decision making.

Andi Wang, BA, Gabrielle A. Morgan, MA, Amy S. Pallier, MD, and Lauren M. Puchman, MD
The long-term risk of lymphoma and skin cancer did not increase after topical calcineurin inhibitor use and phototherapy in a cohort of 25,694 patients with vitiligo

Bottom line: Our cohort study could help patients alleviate excessive concerns about topical calcineurin inhibitors use and phototherapy.

Hyun Jeong Ju, MD, Ju Hee Han, MD, Min-Soo Kim, MD, Si-Hyung Lee, MD, PhD, Jung-Won Shin, MD, PhD, Mira Choi, MD, PhD, Ki-Heon Jeong, MD, PhD, Tae Young Han, MD, PhD, Chong Won Choi, MD, PhD, Hee Jung Lee, MD, PhD, Sang Ho Oh, MD, PhD, Sang Hoon Lee, MD, PhD, Dong Hyun Kim, MD, PhD, Jeonghyun Shin, MD, PhD, Jong Hee Lee, MD, PhD, Sang Seok Kim, MD, PhD, Hee Young Kang, MD, PhD, Sung Eun Chang, MD, PhD, Jeong-Soo Kim, MD, PhD, Dong-Youn Lee, MD, PhD, Gwang Seong Choi, MD, PhD, Dae Hun Suh, MD, PhD, You Chan Kim, MD, PhD, Chul Jong Park, MD, PhD, Ki-Ho Kim, MD, PhD, Ai-Young Lee, MD, PhD, Kyoung Chan Park, MD, PhD, Mu-Hyoung Lee, MD, PhD, and Jung Min Bae, MD, PhD, on behalf of the Korean Society for Vitiligo and the Korean Society for Photomedicine

Association of the Affordable Care Act’s Medicaid expansion with the diagnosis and treatment of clinically localized melanoma: A National Cancer Database study

Bottom line: Public health policies such as Medicaid that improve insurance coverage among lower socioeconomic status populations may lead to earlier melanoma diagnoses, potentially improving outcomes among these disproportionately affected communities.

Richard J. Straker III, MD, Yun Song, MD, Adrienne B. Shannon, MD, Emily Y. Chu, MD, PhD, John T. Miura, MD, Michael E. Ming, MD, MSCE, and Giorgos C. Karakousis, MD

Risk of liver disease in patients with psoriasis, psoriatic arthritis, and rheumatoid arthritis receiving methotrexate: A population-based study

Bottom line: Conservative hepatotoxicity monitoring may be warranted in patients receiving methotrexate for psoriatic disease.

Joel M. Gelfand, MD, MSCE, Joy Wan, MD, MSCE, He Zhang, PhD, Daniel B. Shin, PhD, Alexis Ogdie, MD, MSCE, Maha N. Syed, MBBS, and Alexander Egeberg, MD, PhD
Safety of low-dose oral minoxidil for hair loss: A multicenter study of 1404 patients

Bottom line: Although infrequent, dermatologists should be aware of the potential systemic adverse effects of low-dose oral minoxidil, which include lightheadedness, fluid retention, tachycardia, headache, periorbital edema, and insomnia.

Sergio Vañó-Galván, MD, PhD, Rodrigo Pirmez, MD, Angela Hermosa-Gelbard, MD, Óscar M. Moreno-Arrones, MD, PhD, David Saceda-Corralo, MD, PhD, Rita Rodríguez-Barata, MD, Juan Jimenez-Cauhe, MD, Wei L. Koh, MBBS, MRCP, Janina E. Poa, MD, FPDS, Rebekka Jerjen, BMSc (Hons), MChD, Lara Trindade de Carvalho, MD, Jared Marc John, BMSc (Hons), MBBS, MPH, Corina I. Salas-Callo, MD, Colombina Vincenzi, MD, PhD, Lu Yin, MD, Kristen Lo-Sicco, MD, Anna Waskiel-Burnat, MD, PhD, Michela Starace, MD, PhD, Jose Luis Zamorano, MD, PhD, Pedro Jaén-Olasolo, MD, PhD, Bianca Maria Piraccini, MD, PhD, Lidia Rudnicka, MD, PhD, Jerry Shapiro, MD, PhD, Antoneilla Tosti, MD, PhD, Rodney Sinclair, MD, FACD, and Bevin Bhoyrul, MBBS, MRCP

An evidence-based guide to SARS-CoV-2 vaccination of patients on immunotherapies in dermatology

Bottom line: The SARS-CoV-2 vaccines approved and distributed are expected to be safe for patients on immunotherapeutics with some variability in efficacy, depending on the degree of immunosuppression and type of vaccine given.

Louise M. Gresham, MD, Barbara Marzario, MD, Jan Dutz, MD, FRCPC, and Mark G. Kirchhof, MD, PhD, FRCPC

Neurofibromatosis type 1: New developments in genetics and treatment

Bottom line: Modified diagnostic criteria and an algorithm for surveillance and treatment are provided to assist in diagnosis and health care maintenance.

Britney N. Wilson, BA, MS, Ann M. John, MD, Marc Zachary Handler, MD, and Robert A. Schwartz, MD, MPH, DSc (Hon), FRCP Edin

The impact of demographics, socioeconomics, and health care access on melanoma outcomes

Bottom line: An understanding of factors that affect melanoma outcomes can inform clinical practice and health care policy and can lead to improved detection and management of this aggressive malignancy.

Jose L. Cortez, MS, Juan Vasquez, BA, and Maria L. Wei, MD, PhD
Oral minoxidil improves background hair thickness in lichen planopilaris

Disseminated intravascular coagulation in Stevens-Johnson syndrome and toxic epidermal necrolysis

Bottom line: Patients with Stevens-Johnson syndrome/toxic epidermal necrolysis complicated by disseminated intravascular coagulation had a significantly higher risk of multiple organ failure and mortality. Therefore, early recognition and appropriate management of disseminated intravascular coagulation are important for patients with Stevens-Johnson syndrome/toxic epidermal necrolysis.

Full text access to Journal of the American Academy of Dermatology Online is now available for Academy members and all print subscribers. To activate your online subscription, please visit Journal of the American Academy of Dermatology Online by pointing your browser to http://www.jaad.org.

Early online publication: Articles in press
The Journal of the American Academy of Dermatology posts in-press articles online before they appear in the print edition of the Journal. These Articles in Press are available from both the JAAD website (www.jaad.org) and Science Direct (www.sciencedirect.com).

To access Articles in Press, simply click the Articles in Press link.

JAAD Case Reports
The Journal of the American Academy of Dermatology no longer publishes Case Reports. These can now be found in our new open access journal, JAAD Case Reports, at http://www.jaadcasereports.org.
